PROFILE

Detail-oriented Data Analytics professional skilled in data cleaning, visualization, and insights generation; presently expanding expertise in Frontend Development.

EDUCATION

Nalanda Institute of Technology,Bhubaneswar **Bhubaneswar, Odisha**

BTech in Computer Science & Engineering **2022 – 2026**

CGPA: 7.95(TILL 7TH SEM.)

Class XII(PCM) – **Banikilo Higher College,Nayagarh** **2019-2021**

Percentage: 79.8%

Class X – **DAV,Khordha** **2019**

Percentage: 78%

Among Top 5% of the batch

Relevant Coursework: Database Management, Probability & Statistics, Machine Learning

SKILLS

Technical Skills: Python, SQL,PowerBI, Excel, Statistics, Data Cleaning, Data Visualization,Azure

Tools: Tableau, PowerBI Desktop, Jupyter Notebook, GitHub

SOFT SKILLS

- **Problem-Solving**: Designed and implemented features like course browsing, search, and enrollment to address learner needs effectively. Communication: Documented project workflow and explained features clearly to mentors for feedback and improvements.
- **Team Collaboration**: Worked in coordination with peers to integrate front-end and back-end modules smoothly. Project Management: Planned development phases, tracked progress, and delivered the project within the defined timeline.

INTERNSHIP & EXPERIENCE

Certification in Artificial Intelligence & Machine Learning – CTTC

Topics Covered: Machine Learning, Deep Learning, Python for AI, Data Preprocessing, Model Training, Neural Networks, NLP, Computer Vision

CERTIFICATIONS

- Carrer Essentials in Data Analytics by Microsoft– Feb 2025
- NoviTech R&D Private Limited Data Analytics Certificate – Jun 2024

- Deloitte Data Analytics Job Simulation – Forage – July 2025
- TATA GenAI Powered Data Analytics Job Simulation – Forage –July 2025...etc .

PROJECTS

- **Face Recognition System (Python, OpenCV):** Developed a real-time face recognition model as part of an academic project, applying image preprocessing and classification.
- **Wine Quality Analysis (Python, Pandas, Matplotlib, Seaborn):** Cleaned and explored dataset of 6,500+ rows; identified key chemical factors affecting wine quality through statistical analysis.
- **Music Store Database Analysis (SQL, Excel):** Analyzed customer behavior and revenue trends using complex SQL queries; delivered insights that improved marketing and sales strategy.
- **Sales Dashboard (Tableau/Power BI):** Designed interactive dashboard to track revenue, KPIs, and trends; improved reporting efficiency and decision-making process.

ACHIEVEMENTS

Among Top 5% students in academic batch (2022–2026).

•Completed Google Data Analytics Certification, gaining expertise in SQL, Excel, Tableau, and visualization.

•Selected for Deloitte and TATA Forage job simulations, gaining hands-on exposure to real-world analytics case studies. identifying the top 3 factors influencing wine quality and presented findings to senior stakeholders.

•Developed a Frontend website project (React/HTML/CSS/JS) to strengthen full-stack skills alongside analytics expertise.

•Built a Sales Dashboard in Tableau/Power BI, enabling better decision-making through trend and KPI analysis.
•Identified and resolved data discrepancies in the customer database with queries, improving data accuracy by 100% and ensuring correct reports to stakeholders.
